Re-implementation of Dynamics AX to integrate with Freight Net, a custom-built solution in place to manage their Operations, to manage their core finances at their back office.

- Dynamics AX 2012 Re-Implementation
- Integrated Dynamics AX with Freight Net
- Major enhancements in the Purchase & Sales orders levels
- Advance Account Structure configuration

Dynamics AX implementation with Freight Net allows full visibility into Financials and fast-tracking of revenue & expenses, leading to effective financial operations and improved productivity. Enhancements in the account structures and purchase process moved from spreadsheet-driven budgeting and allocations and eliminated cumbersome manual works to offer financial stability. Comprehensive suite of management reports delivered covering Profit & Loss, Balance Sheet and Cashflow.
